* We provide this item in a full range of commonly-used raw materials.

Over 2,900 Custom SKU's in Inventory

As members of the Global Supply Alliance (GSA), we leverage our global supply chain to bring competitive pricing and top-rated quality in all the products we source. To ensure this promise, each new part goes through a rigorous inspection process at our onsite quality control lab prior to sending samples to our customers. Our current suppliers have passed an intensive approval process and potential new suppliers are researched and sometimes visited by a resident GSA member in country for approval/audit. In addition, we regularly administer supplier scorecard rating reviews and supplier audits to ensure that quality is always at top-of-mind within our supply base.

Reduce Cost with Inventory Management Services

With Falcon's inventory management services, we can source and stock products in higher/bulk quantities to ensure the best manufacturing method and process for your product, reduce the piece price, and reduce or eliminate lead times on your custom parts. Ask about our inventory management services today or visit reliablestock.com for more information.
